

AUGUST ACTIVITY PAGE

Dr. Optical and Miss Illusion are fascinated by animal eyes. Read each clue and guess the name of the animal. Then find that animal's eye in the column on the left. The answers are below, but don't peek!

A

1. The _____ has eyes made of hundreds of separate little eyes. (Eye _____)

B

2. The _____ has eyes that glow in the dark because of the silvery "mirrors" that reflect light and make it easier for him to see in the dark. (Eye _____)

C

3. The _____ has eyelashes that can be as long as 4 inches to protect his eyes from the sand. (Eye _____)

D

4. The _____ has eyes that can see a mouse moving over 150 feet away with light no brighter than a candle. (Eye _____)

E

5. The _____ has eyes that can see a rabbit about 1 mile away. (Eye _____)

F

6. The _____ is a predator, an animal with eyes on the front of his head so he can track prey. (Eye _____)

G

7. The _____ is an animal of prey with eyes on the side of his head so he can see a predator sneaking up on him. (Eye _____)
